Professional Summary

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning with strong technical expertise in Python programming, deep learning frameworks, and computer vision techniques. Experienced in developing AI-driven applications using PyTorch, TensorFlow, and OpenCV, with hands-on experience in Linux systems, backend development, and data processing tools. Passionate about building intelligent systems and advancing practical applications of AI.

Technical Skills

Programming: Python, C, C++, Java, JavaScript

Machine Learning: PyTorch, TensorFlow, Scikit-learn

Computer Vision: OpenCV, Neural Radiance Fields (NeRF), 3D Reconstruction, Image Processing

Data Processing: NumPy, Pandas

Backend Development: Node.js, REST APIs

Databases: MySQL, PostgreSQL, JDBC

Systems: Linux, Docker, Shell Scripting, SELinux

Tools: Android Studio, Figma, FlutterFlow

Experience

Project Intern – CDAC Chennai

Jun 2025 – Aug 2025

- Worked on Linux OS hardening with emphasis on secure system configuration.
- Implemented and analyzed SELinux security policies and secure boot mechanisms.
- Gained hands-on experience with system-level security practices in Linux environments.

Research Work

Early Dementia Detection using Voice and Text Analysis

- Developed a machine learning pipeline to identify early dementia through speech and linguistic analysis.
- Extracted MFCC and spectral audio features from voice recordings for predictive modeling.
- Designed and trained a Convolutional Neural Network (CNN) for speech-based dementia classification.
- Applied feature fusion techniques to combine acoustic and linguistic features for improved model performance.
- **Tech Stack:** Python, PyTorch, Librosa, Scikit-learn, NumPy, Pandas

Projects

3D Heritage Reconstruction using Neural Radiance Fields (NeRF)

- Built a 3D reconstruction pipeline to generate photorealistic 3D scenes from multi-view heritage structure images.
- Performed camera pose estimation and sparse point cloud generation using COLMAP.
- Trained a Neural Radiance Field model to synthesize novel viewpoints and reconstruct detailed scene geometry.
- Applied OpenCV-based preprocessing techniques to enhance image quality and reconstruction accuracy.
- **Tech Stack:** Python, PyTorch, OpenCV, COLMAP, Nerfstudio

Achievements

- Winner – Chem-E-Ignite 2025 Startup Pitch Competition, IIT Madras for presenting ZenithCrom, an AI-driven vertical farming system focused on sustainable agriculture and aligned with United Nations Sustainable Development Goals (SDGs).
(16 March 2025)
- Winner – Prayan 2026 Hackathon conducted by National Institute of Technology Tiruchirappalli (NIT Trichy) and sponsored by Khel.ai for developing a high-performance FPS camera software capable of dynamically adjusting ISO and related imaging parameters at 60+ FPS, while detecting overlapping pixels for enhanced real-time image processing accuracy.
(February 2026)

Education

SRM IST – Trichy	2027
B.Tech – Computer Science and Engineering (Artificial Intelligence and Machine Learning)	
CGPA – 8.5/10	
ST. Thomas Matriculation Higher Secondary School	2023
Class XII – State Board (MPC) – Thoothukudi	
Percentage – 79%	
ST. Thomas Matriculation Higher Secondary School	2021
Class X – State Board (MPC) – Thoothukudi	
Percentage – 80%
